

Fencing

Silt Fence

Silt Fence is the most commonly used fabric for erosion control in residential and commercial construction. DeWitt **Silt Fence** is made from woven polypropylene yarns, which is designed to block the sediment while letting the water slowly flow through the fabric. If properly installed, it can control sediment from being washed into streams and rivers, which results in killing fish and other aquatic life.

Deer Fencing

DeWitt **Deer Fencing** is a safe, humane alternative to wire fencing. It discourages deer and other small animals from destroying gardens and other vegetation. DeWitt **Deer Fencing** is an environmentally safe mesh netting made from 3/4" polypropylene strands bonded together, and UV treated for longer-lasting durability. It attaches easily to metal or wooden stakes.
